SERVICE OPPORTUNITIES

Sense, I am doing a separate essay, I just want to say that I have a lot of great ideas but when I talk with the group (Jaden, Gabriel, Sabyn, and Julie). One great idea that we all agreed on was donating our coral to Legoland, to spread awareness. For my opinion on that I believe it is an amazing idea. As my job the Communicator I would like to locate the manager of Legoland and would like to tell them that we would like to donate our coral to their aquarium and to tell the people about the project and we would want to spread an awareness to stop keep the ocean clean and to show that we care about the population that is happening in the ocean.

I believe that this idea could really work because a lot of people cares about the ocean and the people should what happened in the life of the oceans. this can do well in the services of an event that can change the peoples' mind and that we can prove that the ocean is more that just to swim in that there's life that needs to be take care of. But for My group I would like to do this idea because it will help in our exhibition because when people our coming to the class I would like to give her a presentation about our project that we did and tell them what was the main key of this project. And I will say how much time we took to do our tank and out racks and give them a brief history of our work and what is coral. I believe that the people will like to listen of what our team have to say about the coral.
